

MICHELIN

MICHELIN Red Inner Tubes

have a world-wide reputation for durability for the following reasons:

1st: Michelin Red-Rubber Tubes are compounded of certain quality-giving ingredients which prevent them from becoming brittle or porous and which preserve their velvety softness indefinitely.

2nd: Michelin Tubes are not simply pieces of straight tubing with their ends cemented, but are formed on a ring mandrel to exactly the circular shape of the inside of the casing itself and consequently fit perfectly.

CENTRAL GARAGE
Anderson, S. C.

Michelin Red Inner Tubes give the utmost economy and satisfaction.

CALOMEL IS MERCURY! IT SICKENS! ACTS ON LIVER LIKE DYNAMITE

"Dodson's Liver Tonic" Starts Your Liver Better Than Calomel and Doesn't Salivate or Make You Sick.

Listen to me! Take no more sickening, salivating calomel when bilious or constipated. Don't lose a day's work! Calomel is mercury or quicksilver which causes necrosis of the bones. Calomel, when it comes into contact with your bile crashes into it, breaking it up. This is when you feel that awful nausea and cramping. If you are sluggish and "all knocked out," if your liver is torpid and bowels constipated or you have headache, dizziness, coated tongue, if breath is bad or stomach sour just take a spoonful of harmless Dodson's Liver Tonic on my guarantee.

Here's my guarantee—Go to any drug store and get a 50-cent bottle of Dodson's Liver Tonic. Take a spoonful to-night and if it doesn't straighten you right up and make you feel fine and vigorous by morning I want you to go back to the store and get your money. Dodson's Liver Tonic is destroying the sale of calomel because it is real liver medicine, entirely vegetable, therefore it can not salivate or make you sick. I guarantee that one spoonful of Dodson's Liver Tonic will put your sluggish liver to work and clean your bowels of that sour bile and constipated waste which is clogging your system and making you feel miserable. I guarantee that a bottle of Dodson's Liver Tonic will keep your entire family feeling fine for months. Give it to your children. It is harmless; doesn't gripe and they like its pleasant taste.

EUROPE'S STEAL ON FATHER TIME IS OLD TO CLEVELAND

American City Was Practicing This Efficient Increase of Daylight Long Before War Made It Necessary in Europe.

Some of the Advantages That Ohio City Have Found In System—Detroit Has Also Adopted It and Chicago May.

AMERICA first! First in the matter of practical invention, anyhow! For that much mooted plan of the Europeans to prolong daylight by putting the clock ahead has been practiced quietly but successfully in Cleveland, O., for the past two years.

So suitable have been the advantages gained by this "made in America" device that Detroit, Cleveland's sister city, has adopted it; a number of Canadian cities have come into the ring, and even Chicago is thinking seriously of the project.

It all began with this stern and unimpassioned ordinance:

Be it ordained by the council of the city of Cleveland, state of Ohio:

Section 1.—That the standard of time throughout the city of Cleveland shall be that of the seventy-fifth meridian of longitude west from Greenwich, known as "eastern standard time." Municipal offices and legal or official proceedings of the city of Cleveland shall be regulated thereby, and when by ordinance, resolution or action of any municipal officer or body an act must be performed at or within a prescribed time it shall be so performed according to such standard of time.

Sec. 2.—When a clock or other timepiece is in or upon a public building maintained at the expense of the city of Cleveland, the board, commission, officer or other person having control and charge of such building shall have such clock or other timepiece set and run according to the standard of time as provided in section 1 hereof.

Sec. 3.—This ordinance shall take effect from and after the thirtieth day of April, 1914.

And so at 12 o'clock, midnight, preceding May 1, 1914, some 670,000 Clevelanders turned the hands of their clocks one hour ahead and have never since wanted to turn them back.

Since the adoption of Eastern standard time 2,000 more Clevelanders have been daily playing baseball in the Cleveland parks during the summer season, and an additional 1,000 others have been playing tennis for that hour of daylight which they have secured for themselves by one hour of earlier rising.

But not only have the beneficent effects of securing an extra hour of daylight been conferred upon the men, women and children of Cleveland, but this city has "let her light so shine" that her sister city of Detroit has adopted the same system with the same beneficial results.

For Eastern Time.

The adoption of Eastern standard time by the city of Cleveland was the result of considerable careful and painstaking study on the part of a special committee of the Cleveland chamber of commerce. It was on Oct. 1, 1913, that the Cleveland chamber authorized its president "to appoint a committee to study and report to the board on the advantages to be derived from the establishment of Eastern time in Cleveland, and its disadvantages if there be any." The project, as considered by the committee, was primarily that of securing more daylight for the community during the active hours of the day by advancing the hands of the clock one hour.

The committee at the beginning of its deliberation considered the change to eastern time both with regard to its adoption by the state through legislative action and by Cleveland alone. The arguments for both are practically identical. It was assumed "that the railroads would not be compelled to comply with the action that might be taken in the consummation of either plan of adoption."

Here are a few facts with regard to the hours of daylight in this latitude: Light before the sunrise and after sunset varies from fifteen minutes to one and a half hours, depending upon weather conditions, and the figures to be found on daylight and darkness as presented by the committee were based upon ideal weather conditions. The day of June 22 of each year in Cleveland shows the greatest amount of daylight, or fifteen hours and fourteen minutes. The 23rd day of December, on the other hand, experiences only nine hours and eleven minutes of daylight, which is the smallest amount of the year. The earliest rising of the sun is at 6:51 o'clock and the latest rising at 6:54 o'clock; also the earliest setting occurs at 6:55 o'clock and the latest setting at 7:00 o'clock. These figures show that on the day of the longest daylight the sun rises at too early an hour to benefit the majority of our citizens, and on the day of latest sunset many are deprived of the sunlight after working hours by its early setting. Assuming that the average hours of rising and setting are 6 and 10 o'clock, respectively, 201 hours, or the equivalent of thirty-three minutes more daylight each day during the year are secured for added activities by the adoption of eastern time.

In a city like Cleveland the recreation of the majority of its citizens is taken during the afternoon and early evening. This part of their lives is one of the most important and is essential to the enjoyment of their more serious efforts. By the adoption of eastern standard time these citizens

were given 234 hours of additional daylight during the year. That time has been devoted to many forms of outdoor recreation. Two hundred and seventy-six days, or over 75 per cent of the year, were afforded daylight after 5:30 o'clock in the evening.

As For Newspapers.

When the Cleveland baseball club is at home reports of the games are ready for the evening newspapers an hour ahead of previous times, thus giving the reader an extra hour of daylight in which to read it, and distributors of papers need not be told what that would mean to circulation. It has been found of mutual advantage both to the evening newspaper reader and to the newspaper maker in Cleveland.

The saving in the cost of artificial illumination has proved of great benefit to the people of Cleveland. The private residence uses artificial illumination only during the hours between rising and retiring. With 201 hours of daylight added during the year between the hours of 6 o'clock a.m. and 10 o'clock p.m. the item of saving in illumination cost is considerable, both in private and public buildings.

Stores Open at Eight.

The majority of Cleveland's stores open at 8 o'clock and close at 5:30 o'clock, and changing to eastern time threw them from an hour to an hour and a half behind the setting of the sun on the day of least daylight. By the adoption of eastern standard time an attendant decrease of 131 hours of darkness in the year was attained.

The movement started by the Cleveland chamber of commerce committee on eastern time, of which Mr. Samuel H. Hall, a Cleveland merchant, has been chairman continuously, at once caught the attention of the Cleveland Federation of Labor, the Cleveland Amateur Football Association and the Cleveland Amateur Baseball Association, which is one of the largest in the world. These organizations immediately endorsed the project and have been the happy recipients of many of its benefits.

It is true that travelers must change their watches upon arriving in Cleveland. The Erie railroad and the suburban lines serving Cleveland have alone adopted eastern time. This, however, is a very small inconvenience compared with the following benefits:

A benefit to health.
Additional hours of recreation for the toiler.
Better conditions for sleep.
A benefit to the welfare of children.
An advantage to suburban residents and nearby farmers.
More daylight for the return of workers to their homes.
More efficient work in industrial plants.

Clear mail, telegraph, telephone, freight and express connections with the east.

Saving in the cost of artificial illumination.

A general step toward ideal time conditions.

As a result of the interest created by the report of the chamber committee the council of the city of Cleveland on March 9, 1914, passed an ordinance declaring that on and after May 1, 1914, eastern time should be established in Cleveland.

The committee on eastern time is still retained by the Cleveland chamber of commerce not because there is any thought in Cleveland of returning to former conditions, but because other western cities are watching the movement with interest, and the committee, having already conferred these benefits upon Detroit and some Canadian cities, hopes are long to bring Chicago under its beneficent influence.

WOMAN IS A DOG CATCHER.

Milwaukee Millionaire Asks City to Increase Her Salary.

Miss Lendora Cawker, Milwaukee's millionaire dog catcher, wants a raise in pay. She has been paying the entire cost of the department, including the operation of a dog hospital, automobile, besides giving her own stables for a dog pound, all for a salary of \$300 a year. She has asked for an appropriation of \$1,200 for her services, representing half the expense of her work.

She says she is willing to pay, as evidence of her love for animals. But she thinks the city ought to show that it appreciates her efforts. Her dog pound is in the aristocratic west side district, where her home covers half a city square.

Devise New Army Salute.

A new emergency army ration of four lean beef and dried milk to be used where it is impracticable for troops to carry food that has to be cooked, will be tried out soon by the war department. The new ration is in the form of a biscuit, and the materials are bound together with grape sugar. Ten thousand rations have been ordered for experimental purposes.

The Season Opens.

We've had another building boom along our street this spring. On every slightly vacant space construction is in full swing. The masons and the carpenters are busy every day. To get new summer homes in shape before the 1st of May. The families have all come back that went away last fall, and you can't find a vacant house along the street at all.

The robins, who are always keen for places in the sun, have picked a plot that's called "The Elm" and have their camp half done. The orioles, who like to have a wide and sweeping view, have built an airy bungalow, all epic and apian and new. And in a leafless hickory stump—half crumbling and decayed—You'll find, perhaps, the sheltered home that Mr. Flicker's made.

The blue birds took the same old house they had last year again. And let the upstairs tenement to Mrs. Jenny Wren. They quarrel sometimes; but, often you know by shreds of song, they get along about the way most neighbors do. Some distance from the busy street, half hidden in the brush, a fine large house is going up—the house of Mr. Thrush.

There's lots of life about the place before the peep of dawn. Until the earliest stars are out there's something going on. With muscades at 4 a. m. and twilight serenades. And picnics every afternoon among the grassy glades. And with a peppery fight or two, for ginger now and then. The long neglected little street is quite itself again. —James J. Montague in New York American.

AGED HINDU SOLDIER WANTS TO DIE IN BATTLE

Although Seventy, Sir Pertab Singh Is Returning to the Front.

Sir Pertab Singh, veteran Indian soldier, has left India on his return to France.

In this brief statement lies the story of a man who wants to die.

But Sir Pertab Singh, seventy-year-old Indian noble, despite his years is particular about his mode of demise.

Demanding his right to fight for the king-emperor of India—George V.—at the beginning of the war, this aged Indian officer, for months invited death on the bloody battle grounds of Flanders. With fanatical bravery he repeatedly charged at the head of his men toward the German trenches. But fate and German bullets denied him death. No bullet even grazed him.

The story has reached the India office in London of how Sir Pertab shrinks in horror from the sneaky death that comes to soldiers in the trenches. He has no desire for death from trench bombs that come lobbing over from the German side or from shrapnel fire or hand grenades. He insists that there could be no greater glory than to be punctured by an enemy missile while on the charge. To be thus punctured was his sole aim during his several months in Flanders.

Some time ago Sir Pertab reluctantly returned to India on account of pressing business. He announced that he would return at the earliest possible moment.

The cablegram from Bombay announces that he is coming back to France to have another fight with death. Forthcoming casualty lists will be closely watched.

CIGARETTES BAR RECRUITS.

Marine Corps Doesn't Want Men With Faulty Respiration.

Faulty respiration and tachycardia, or rapid heart beat, due to excessive cigarette smoking, caused 50 per cent of rejections at the United States marine corps recruiting station in New York city since May 1, according to Captain Frank E. Evans, recruiting officer.

Although many young men were influenced by the preparedness parade to seek out the recruiting officers for the marine corps, not a single applicant has been accepted of those who applied.

The marine corps standard is very high, Captain Evans explains, and of the last 149 applicants examined nearly half were found upon examination to have rapid pulses, shortness of breath and other symptoms easily recognized in the applicant who smokes cigarettes excessively or incessantly.

TOO MUCH FOR ONE STORK.

Arrival of Boy Is Omen to Boulder—'Job Number of Animal Births.'

John Harmon of near New Market, Del., had an exciting time the other night when he was wakened by considerable noise in the barn. Hastily donning his clothing, he rushed down to investigate and was greeted with a new colt.

He had hardly finished looking it over when a lowing in the stable began, and going there was astonished to find a pretty little calf had arrived.

At the woodshed he found a whole nest of little bird dog pups and on returning to his room was astonished to find that his wife had presented him with a bouncing baby boy in six minutes.

Called by Name.
The clerk of the United States senate started to read the name "Rene" and stopped. He had heard the name "Rene" but knew it was not a name that should be used in the senate. He then asked the name of the senator who had introduced the bill, and was told it was "Rene" and that it was a name that should be used in the senate.

Children Cry for Fletcher's

CASTORIA

The Kind You Have Always Bought, and which has been in use for over 30 years, has borne the signature of *Dr. J. C. Fletcher* and has been made under his personal supervision since its infancy. Allow no one to deceive you in this. All Counterfeits, Imitations and "Just-as-good" are but experiments that trifle with and endanger the health of Infants and Children—Experience against Experiment.

What is CASTORIA

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other Narcotic substance. Its age is its guarantee. It destroys Worms and allays Feverishness. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic, all Teething Troubles and Diarrhea. It regulates the Stomach and Bowels, assimilates the Food, giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

GENUINE CASTORIA ALWAYS

Bears the Signature of

In Use For Over 30 Years

The Kind You Have Always Bought

THE CENTAUR COMPANY, NEW YORK CITY.

Side Dressing

We have an ideal Fertilizer for Side Dressing Cotton and Corn. It is heavily charged with soda for quick action and then the other ammoniacs in this Side Dressing will continue the growth started up by the soda. These goods are made especially for Side Dressing and is just what the crop needs. A great many people think Cotton will bring a good price next fall. If it does, you will want all you can make. If it should be low you will need all you can make. Side Dressing applied early makes more Cotton, there is no earthly question about that. It brings you in about \$3.00 for every dollar you pay out.

It should be applied just as fast as you get your Cotton thinned to a stand and cleaned out.

We are ready with the goods.

The cotton crop is about 15 days late at this time. Side dressing may prove unusually profitable this year if we have an early frost.
